Unified English Braille

In November 2012, the Braille Authority of North America (BANA) voted to adopt the Unified English Braille Code (UEB) as the official code for the United States. We then joined several other countries who adopted UEB before us. The new code was implemented in the U.S. on January 4, 2016 and since then, we have converted over 600 of our books to UEB, making Seedlings a leader in UEB books for children.

We started with our books for younger children (please see Page 3) and have worked our way up to our popular big books for older children and teens. Some of the bigger books will still be available in the old code (EBAE). Please check our website (seedlings.org) often for updates!

For more information on UEB, see: www.brailleauthority.org

Just as we have in the past, the Seedlings staff will continue to work hard to give you high-quality, low-cost children’s books in braille!

Uncontracted vs Contracted Braille

Uncontracted Braille is the simplest form of braille. It consists of a symbol for each letter of the alphabet and a few for punctuation. In Contracted Braille, several dozen special symbols (contractions and short forms) are added to make the books shorter and reading faster.

Electronic Braille Books
